ABOUT THIS BOOK

This report provides information on Hawaii's economy since the year before Statehood.

The formal definition of Gross State Product is the market value of goods and services produced over the course of the year for final consumption. So within this publication's tables, graphs, and narratives, the user—including the policy maker, researcher, resident and potential resident, and business person—may find the tools to understanding the various sources and uses of Hawaii residents' income.

The six major sectors into which the economy is classified provide information on a general state-wide basis (Gross State Product), for households (Personal Account), the business sector (Saving and Investment Account), State and local governments, the Federal government, and the Rest-of-the World (External Account).

The data (1958 to 1985 with GSP forecast to 1988), are expected to be available on DBED's electronic bulletin board, and IBM compatible diskettes will be available in the near future.

In format and economic framework, this book follows its national counterpart, "The National Income and Product Accounts;" this enables the user to make meaningful comparisons between Hawaii and the United States.

This is the seventh in a series of publications setting forth information on Hawaii's economy. The earlier six volumes were issued by the University of Hawaii's Economic Research Center and, in later years, by the Department of Business and Economic Development, under the title *Hawaii's Income and Expenditure Accounts* reports. Copies may be found in many libraries in Hawaii.

Appreciation is extended to the State Legislature, which funded this work, and to the Federal, State, County, and private organizations that cooperated with the DBED Research and Economic Analysis Division in preparing this book. They are credited in the Introduction and in the References at the end of the volume.

John Waihee
Governor of Hawaii

Roger A. Ulveling
Director of Business
and Economic Development

INTRODUCTION

Comprehensive measurements of national economic performance date back to the Great Depression of the 1930s. During this period of economic collapse, information about what was actually happening in the economy was desperately needed for policymakers to understand what could be done to restore economic health. Since then, the system of national economic accounting that was developed to measure national income and output has been used as the basis for economic policy, either to stimulate the economy or to restrain it when economic expansion gets out of hand.

In recent years, the system of measuring aggregate economic performance has been applied to state and local economies. Just as Gross National Product (GNP) measures the value of the nation's output of goods and services, Gross State Product (GSP) measures the value of goods and services produced in a state economy. In the early 1960s, the State of Hawaii began to develop its own estimates of the annual GSP.

The first Hawaii Income and Expenditure (HIE) Accounts study was requested by the Third Legislature of the State of Hawaii, and the Economic Research Center (ERC) of the University of Hawaii undertook the study in 1960 under the direction of Professor Harry Oshima. The Hawaii Income and Expenditure Accounts for the period of 1958 to 1960 were estimated and the study was published in 1965. The updating of the data through the 1961–1968 period was done by the ERC and was published in 1965 and 1970.

The responsibility for maintaining the Accounts was later transferred to the Research and Economic Analysis Division of the Hawaii State Department of Planning and Economic Development (DPED), which undertook a revision and update and published a three-volume report titled *Hawaii's Income and Expenditure Accounts: 1958 to 1976.*

This publication represents the sixth update and provides first-time estimates for 1984 through 1988 and revisions of estimates for earlier years.

Many significant revisions in methodology and coverage were made in the current update. The revisions of some of the accounts became necessary to reflect recent changes in the structure of Hawaii's economy. New sources of information and improved methodolgy made it necessary to revise the estimates made in previous studies in order to maintain consistency with the currently updated data.

Many individuals and firms in the private sector and individuals and agencies in the public sector have contributed to the successful completion of the current GSPA update and revision.

Within READ, Mary E. Blewitt and Ann Toyomura have been responsible for updating the Personal, State and Local Government, Federal Government Accounts, and visitor expenditures. They also worked on balancing the overall Gross State Product account. Tu Duc Pham, Hamid Jahamir, and Gregory Leong worked on the update of Private Construction and other External Account Estimates and provided the 1986, 1987, and 1988 estimates. Wade Kanikawa worked on the writing of the aggregation programs for the State and Local Government Accounts.

Dr. Mitsuo Ono provided valuable advice and comments as a consultant, based on his experience working on the earlier HIE estimates at ERC.

We are also grateful to Linnea Hazen and her staff at the Bureau of the Economic Analysis, U.S. Department of Commerce for providing detailed statistics on personal income and the Bureau of the Census for allowing the project staff to have access to their unpublished worksheets on the State government expenditure data. Finally, the entire staff of the Research and Economic Analysis Division assisted directly or indirectly in the current update and revisions of the GSPA account.

GUIDE TO TABULAR PRESENTATION

The tables in this publication generally follow the principles of tabular presentation used by the U.S. Bureau of Economic Analysis in its July issue of the *Survey of Current Business* "Natural Income and Product Accounts" and the U.S. Bureau of the Census in its annual publication, *Statistical Abstract of the United States,* and described in the Bureau of the Census *Manual of Tabular Presentation,* published by the Bureau in 1950. These principles have been accepted by the Department of Business and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of a headnote. In tables where several units are used, the unit indicators are generally given in the column headings.

Footnotes following a sector give information relating to specific items, figures, or symbols within a table.

Indentation is used in a given column to indicate that the components which follow add to the total.

In many tables, details will not add to the totals shown because of rounding.

Geographic coverage should be understood as Statewide unless otherwise indicated in the table title, headnote, boxhead, or stub.

All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Per capita (or per person) categories represent an average computed for every person in a specified group or population. It is derived by taking the total for an item (such as Gross Product *or* Personal Income) and dividing it by the number of persons in the specified population, e.g. residents.

Index Numbers are measures of difference or change, usually expressed as a percent, relating one quantity of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time but also may be used to express differences between related subjects for a single period of time, e.g. Per Capita Gross Product of the U.S. compared to that of Hawaii.

To compute a price index, a base year is selected. The base year price of the commodity or service is then designated as the base or reference price to which the prices for other years are related. Some price indexes, such as the Consumer Price Index (CPI), use 1967 as the base year, others, such as the GSPA and GNP Implicit Price Deflators, use 1982 as the base year. In tables, this would be shown as 1967 or "1982=100.0." A method of expressing the price relationship is:

$$\frac{\text{Price of a set of items for a given year}}{\text{Price of the same items in the base year}}$$

The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year. Percent Change is computed as:

$$\frac{\text{Value in the Second Year} - \text{the First}}{\text{Value in the First Year}}$$

The result multiplied by 100 provides the percent change.

Current and Constant Dollars. Statistics in some tables in a number of sections are expressed in both current and constant dollars (e.g. Table 1-6 for Gross Product, U.S. and Hawaii). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar figures are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (e.g. the CPI). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words, as if the dollar had constant purchasing power. Any changes in this contant dollar series would reflect only changes in real volumn of output, income, expenditures, or other measure.

- Represents zero

* Represents estimate rounded to less than half the unit of measurement shown

D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual

f Indicates data are presented for fiscal rather than calendar year

NA Data not enumerated, tabulated or otherwise available separately.

p Indicates data are preliminary

Personal Consumption Expenditures
10,606.6

The two basic concepts in the economic accounting process are those of income and expenditures, or what can also be referred to as receipts and payments. These concepts are similar to the more common business terms of debits and credits. The principle behind the use of these terms is that any economic transaction is at the same time an expenditure by one economic unit and an income or receipt by another. The millions of economic transactions that take place can be organized according to function into accounts just as the transactions of a business are organized. What is paid out by one person or unit (i.e. a consumer or a taxpayer) in the economy and is an expenditure for them becomes a form of income or receipt to another unit (a business or government, respectively). The businesses or governments, in turn, make purchases from other businesses and all these units pay wages to their employees. These employees then use these wages to purchase goods, services, etc. In effect, it is the circular flow of goods and services and the recycling of payments that lies at the heart of economic life.

The circular flow occurs among four basic sectors into which the economy is divided: the household (or personal) sector made up of consumers, which supplies labor and capital; the productive sector consisting of firms and businesses, which supplies goods and services; the government sector; and the external sector. The figure above graphically illustrates this circular flow.

Households do not usually spend all of their income. Some may be paid to government as taxes or saved in financial institutions. The government merely redirects this portion of household income for purchases from business according to a social rather than an individual criterion. That portion of income saved is available for borrowing by business (or government) for the expansion of productive capacity or addition to inventory.

To measure how an economy is doing, we need only add up the value of all income received (Table 1-2) or conversely, the value of all expenditures (Table 1-3). Regardless of the measurement used, care must be taken to avoid double-counting. For example, in the case of a loaf of bread, only the final value of the bread is counted and not the values of the consumed wheat and flour, which have already been incorporated in the course of production. In addition, since only current production is measured, neither the purchase nor sale of existing goods, such as houses or capital equipment, is included. These are considered only exchanges of existing assets.

In the diagram above, the GSP for 1985 is $16,813.8 million dollars and the uses to which that income are put can be seen by following the flows to the right.

[1] For 1958–85 data see Table 1-3.

1. GROSS STATE PRODUCT OF HAWAII

Gross State Product (GSP) can be estimated either by summing up all receipts or income flows in the Hawaiian economy on one hand, or, on the other hand, all the expenditures.[1] Charges against GSP is obtained by summing up all income flows (sometimes called factor payments) such as wages, salaries, other kinds of employee compensation, proprietors' income, corporate profits before taxes, net interest, plus other payments such as business transfer payments, indirect business taxes less subsidies, and capital consumption allowances.

Expenditures on GSP is, on the other hand, obtained by aggregating all expenditures that occur in the Hawaiian economy for the purchase of final goods and services in a given year. The main categories of expenditures are personal consumption expenditures; gross private domestic investment; State and local, and Federal governments' purchases of goods and services; and net exports.

The difference between the GSP estimates obtained by the two methods discussed above are reconciled by a balancing item called "Discrepancy and Omissions." The relatively large percentage of this residual in earlier publications has been reduced considerably in this update. This was made possible by incorporating more final data into the estimates than was available at the time of earlier estimates, and by significant improvements in the indicators and other methods used to derive preliminary estimates.

TABLE 1-1 SUMMARY OF HAWAII GROSS STATE PRODUCT ACCOUNTS: 1985[2]

1. GROSS STATE PRODUCT[1]

(In millions of current dollars)

LINE	CHARGES/INCOME	
1	CHARGES AGAINST GROSS STATE PRODUCT[3] (1-29)	16,813.8
2	Compensation of employees	11,094.2
3	Wage and salary disbursements (2-2)	9,208.9
4	Supplements to wages and salaries	1,885.3
5	Employers' contributions for social insurance	1,068.4
6	State programs (4-7)	188.9
7	Federal programs (5-7)	879.6
8	Other labor income (2-3)	816.9
9	Proprietors' income (2-4)	1,003.1
10	Rental income of persons with capital consumption adjustment (2-5)	84.6
11	Corporate profits before tax	661.0
12	Profits tax	189.0
13	State (4-4)	48.7
14	Federal (5-4)	140.3

47	Defense	2,810.1
48	Non-defense	271.9
49	Net exports	– 1,262.8
50	Exports (6-6)	8,449.0
51	Commodities (merchandise)	1,336.3
52	Services and income from investments	2,208.7
53	Visitor and crew expenditures[5]	4,904.0
54	Less: Imports (6-2)	9,711.8
55	Commodities (merchandise)	6,981.2
56	Services and income from investments	2,428.6
57	Out-of-State expenditures by Hawaii residents	302.0
58	Discrepancy and omissions (3-14)	179.7

---

[1] Readers interested in GSP by industry are referred to a U.S. Department of Commerce, Bureau of Economic Analysis study due for release in the April, 1988, issue of the *Survey of Current Business*.

[2] Numbers in parenthesis indicate accounts and items of counterentry in the accounts. *[f]* indicates fiscal year data, *[p]* indicates preliminary estimate.

[3] Time series data and greater detail may be found in Table 1-2, percent change data may be found in Table 1-7 and percent share data may be found in Table 1-8. Comparison of the U.S. GNP and Hawaii GSP may be found in Table 1-6.

[4] Time series data and greater detail may be found in Table 1-3, constant (1982) dollar data may be found in Table 1-4, and price deflators (1982 = 100.0) may be found in Table 1-5.

[5] Refers to purchases of Hawaii residents, both within and out-of-state. Greater detail on resident expenditures in Hawaii may be found in Table 2-6, and on visitor expenditures in Hawaii in Table 6-4.

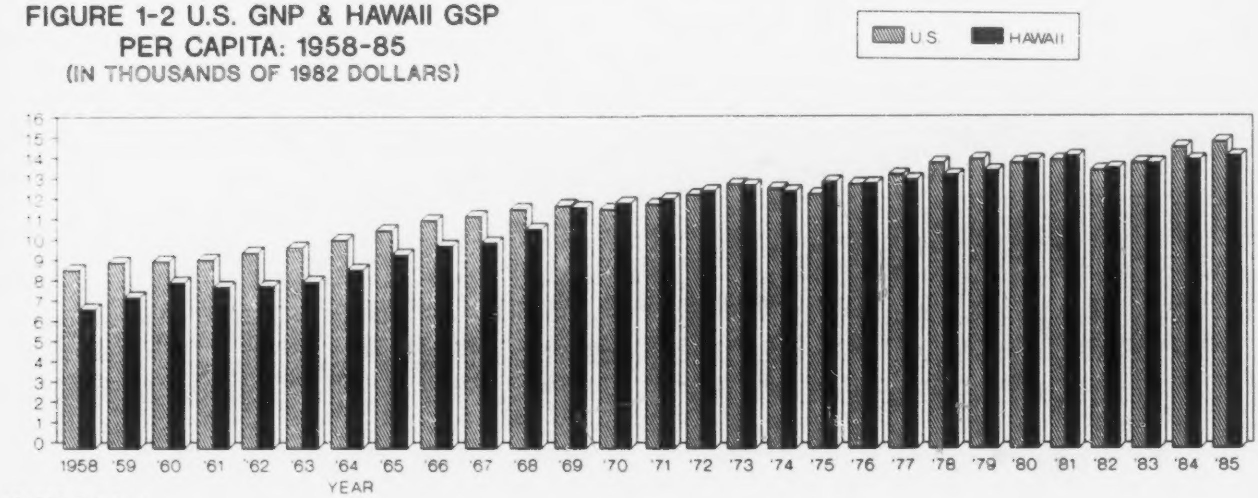
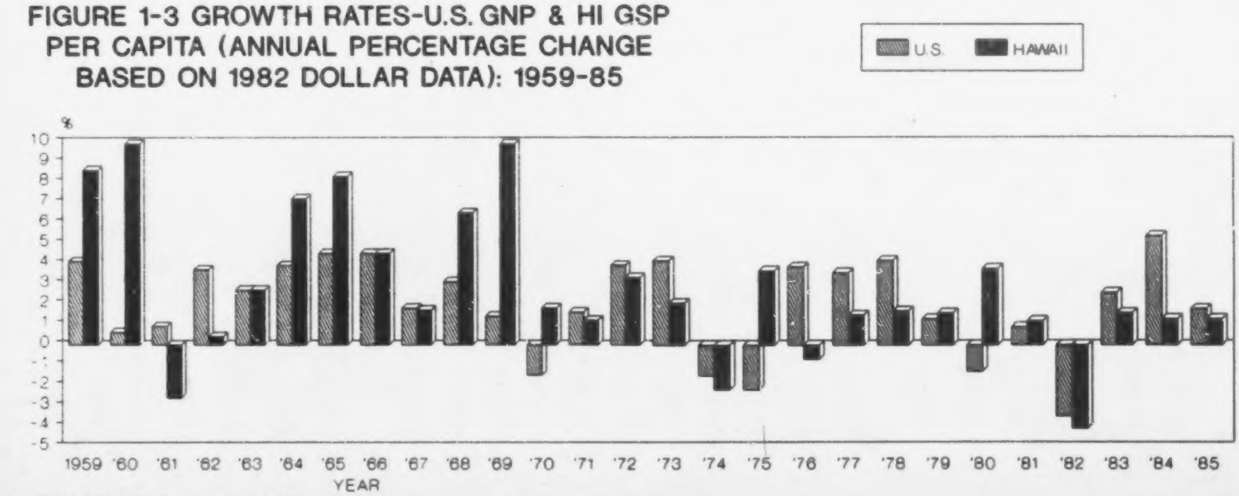
FIGURE 1-2 U.S. GNP & HAWAII GSP PER CAPITA: 1958-85 (IN THOUSANDS OF 1982 DOLLARS)



SOURCE: TABLE 1-6

FIGURE 1-3 GROWTH RATES-U.S. GNP & HI GSP PER CAPITA (ANNUAL PERCENTAGE CHANGE BASED ON 1982 DOLLAR DATA): 1959-85



SOURCE: COMPUTED FROM TABLE 1-6

COMPARISON OF U.S. GNP AND HAWAII GSP: IN CONSTANT 1982 DOLLARS AND PERCENT

Figure 1-1. Growth Rates, 1959 to 1985: Comparing the rates for the U.S. and Hawaii shows no obvious trend, except perhaps that fluctuations seem more severe in GSP than GNP, and that both experienced recessions in 1974–75 and 1982, while only the U.S. showed a decline in 1970.

Figure 1-2. Per Capita, 1958 to 1985: Over most of the period, the U.S. average exceeded Hawaii except for 1970–72, 1975–76, and 1980–82. The latter suggesting that Hawaii residents fared better during that recession than the U.S. average.

Figure 1-3. Growth Rates Per Capita, 1959 to 1985: As in Figure 1-1, the fluctuations for GSP appear more severe than for GNP, and, in addition to the recessions observed above, Hawaii experienced a decline in 1961, and the U.S., in 1980.

COMPARISON OF U.S. AND HAWAII PERSONAL INCOME: IN CURRENT DOLLARS AND PERCENT

Figure 1-4. Per Capita, 1958 to 1985: Before 1969, the differences between the U.S. and Hawaii were not significant, with the U.S. exceeding Hawaii in 1958–60, and 1962. Hawaii was greater in 1961, and 1963 to 1968. Beginning in 1969, however, Hawaii exceeded the U.S. average by a considerable difference. . . a difference which was sustained until 1985, when the U.S. went slightly ahead.

Figure 1-5. Growth Rates, 1959 to 1985: As in Figures 1-1 and 1-3, the fluctuations for Hawaii seem more pronounced than for the U.S., especially for 1969 and 1970. Generally the changes for the U.S. are less than Hawaii's, in the years before 1970, and after that time appear to exceed the growth for Hawaii, except for 1974, 1980, and 1983. Observations which are consistent with those for GNP and GSP above.

FOOTNOTES TO GROSS STATE PRODUCT TABLES

Table 1-1.

[1-16] Shown directly on the table.

Table 1-3.

[1] Corresponds to the "Net personal consumption expenditures" of previous HIE studies; includes all expenditures of Hawaii residents. Greater detail may be found in Tables 2-3, 2-6, and 6-4.

[2] As defined by the NIPA's convention to consider all Out-of-State expenditures by Hawaii residents, and Visitor and crew expenditures as services, even though some are durable or non-durable goods.

[3] Greater detail may be found in Tables 3-2 and 3-3.

[4] Includes purchases by State of Hawaii and four county governments. Greater detail may be found in Tables 4-2 through 4-8, and Table 4-16 through 4-29.

[5] Greater detail may be found in Table 5-3.

[6] Formerly, no disaggregation was shown. Allocators are derived from the DBED construction project data on defense expenditures.

[7] Formerly, no disaggregation was shown. Allocators are derived from the DBED construction project data on non-defense expenditures.

[8] Greater detail may be found in Tables 6-3 and 6-4.

[9] Greater detail may be found in Tables 6-2, 6-5, and 6-6.

Table 1-4.

[1] Corresponds to the "Net personal consumption expenditures" of previous HIE studies; includes all expenditures of Hawaii residents. Greater detail may be found in Table 2-4.

[2] As defined by the NIPA's convention to consider all Out-of-State expenditures by Hawaii residents and Visitor and crew expenditures as services, even though some are durable or non-durable goods. Greater detail is available from READ, on request.

[3-5,8,9] Greater detail is available from READ, on request.

[6] Formerly, no disaggregation was shown. Allocators are derived from the DBED construction project data on defense expenditures.

[7] Formerly, no disaggregation was shown. Allocators are derived from the DBED construction project data on non-defense expenditures.

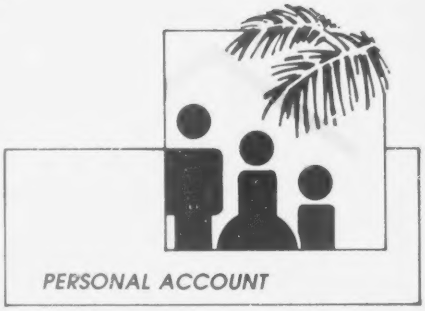
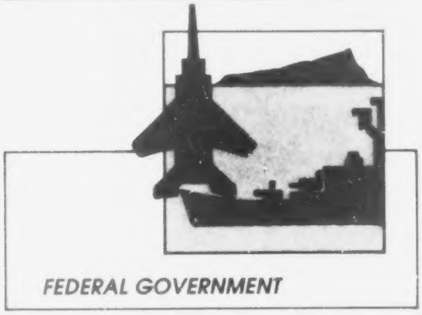
GROSS STATE PRODUCT



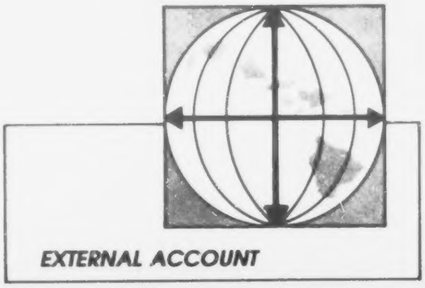
PERSONAL ACCOUNT

SAVINGS AND INVESTMENT

STATE AND LOCAL GOVERNMENT



FEDERAL GOVERNMENT



EXTERNAL ACCOUNT

2. PERSONAL ACCOUNT

The Personal Account is the first of five sectors whose components make up Gross State Product (GSP).

The Personal Account is similar to the Personal Income and Outlay Account of the U.S. Department of Commerce National Income and Product Accounts (NIPA). Within the framework of the Hawaii Gross State Product Accounts (GSPA), this sector estimates the current dollar value of the market transactions between Hawaii residents on one hand and nonpersonal sectors of the economy, on the other hand, such as Hawaii's businesses, State, county and Federal governments, and the rest of the world. Persons are viewed in their capacity as receivers of income and consumers of private and public goods and services. "Persons" includes the activities of individuals and also activities of non-profit institutions and private health, welfare, and trust funds.

The sources of income include wages and salaries, other labor income, proprietors' income, income from rental of property and transfer payments by government and by businesses. Following the NIPA convention, income from the above sources is then reduced by the personal contributions to government-operated social insurance programs. The resulting net total is Personal Income.

The Personal Income total and selected components are published by the U.S. Department of Commerce Bureau of Economic Analysis (BEA). Further detail, as presented in the following tables, is obtained from unpublished data from BEA and estimates of government interest, transfer payments, and personal contributions to social insurance programs as described in the State and local, and Federal government's sectors.

Wages and salaries include remuneration for private and public employment (civilian and military), reported tips and bonuses, commissions and income received in-kind. Other labor income is primarily employers' contributions to private pension, health, and welfare funds made on the employee's behalf. Proprietors' income includes the net income of non-incorporated farms and non-farm businesses. Rental income includes an estimate of royalties from patents, monetary interest earned and also the imputed net interest of owner-occupants of non-farm dwellings. Dividends are cash payments by all corporations to stockholders who are Hawaii residents. Interest is the monetary and imputed (e.g., services provided without charge by financial institutions) interest paid by businesses and State and local, and Federal governments. Transfer payments represent, generally, money income for which no good or service is provided in exchange. State transfer payments may include general assistance, State employee retirement, and educational assistance. Federal programs include OASDHI, unemployment insurance, civilian and military employee retirement. Business transfers are consumer bad debts, prizes and corporate gifts to non-profit institutions.

The deducted personal contributions for social insurance includes both State programs (e.g., State employee retirement) and Federal programs (e.g., OASDHI, Federal employee retirement).

Personal income is then used for the payment of State and local and Federal taxes and non-taxes, and personal outlays (personal consumption expenditures on goods and services, interest payments to businesses, unilateral transfers to persons outside the Hawaiian economy) and the residual-personal saving.

Personal tax and non-tax payments (discussed in the State and local and Federal Government sectors) are deducted from Personal Income to yield that portion over which a person has some discretion—Disposable Income, which is then used for personal outlays. The residual of income over these expenditures is personal savings (by definition, this includes payments on mortgage principal).

Estimation of personal consumption expenditures, which comprise roughly 63 percent of GSP, is a considerable task. Data are generally available as the sales of Hawaii businesses (both civilian and military establishments) and must be adjusted to exclude the purchases by visitors. Residents' expenditures are estimated as sales less visitors' personal consumption expenditures which are discussed in the External Account.

FOOTNOTES TO PERSONAL ACCOUNT TABLES

Table 2-1.

[1] Greater detail may be found in Table 2-2.

[2] Greater detail may be found in Tables 2-2 and 4-1 through 4-29.

[3] Greater detail may be found in Tables 2-2, 5-2, and 5-3.

[4] Corresponds to the "Net personal consumption expenditures" of previous HIE studies; includes all expenditures of Hawaii residents. Greater detail may be found in Tables 2-3, 2-4, and 6-4.

[5] As defined by the NIPA's convention to consider all Out-of-State expenditures by Hawaii residents, and Visitor and crew expenditures as services, even though some are durable or non-durable goods. Greater detail may be found in Tables 2-3, 2-6, and 6-4.

Table 2-2.

[1] Such as textile and apparel, printing and publishing, chemical and petroleum products, and others.

[2] Such as food stores, apparel and accessory stores and others.

[3] Such as personal services, business and recreation services, and others.

[4] Includes employees of Defense and non-defense agencies, including government enterprises. Greater detail may be found in Table 5-3.

[5] Includes U.S. Coast Guard.

[6] Includes the State of Hawaii and four county governments. Greater detail may be found in Tables 4-2 through 4-8, and 4-16 through 4-29. Due to differences in classification, methodology, and data sources, the wages and salaries of State and local government employees in Table 2-2 are not equal to wages and salaries of State and local government employees of Tables 4-2 through 4-8, and 4-16 through 4-29.

[7] Includes transfers to individual persons and nonprofit institutions. Greater detail may be found in Table 1-2.

Table 2-3.

[1] Includes personal consumption expenditures of Hawaii residents (civilian and military) and Visitors and crews. Greater detail may be found in Tables 2-6 and 6-4.

[2] The adjustment required to convert Personal consumption expenditures in Hawaii (a geographical concept) to Personal consumption expenditures (a Hawaii residency concept).

[3] The residual or balancing item between Personal Income and the sum of Personal tax and non-taxes and Personal outlays. It is the current saving of individuals, proprietors, nonprofit institutions and private trust and welfare funds, and includes the net acquisition of financial and physical assets.

Table 2-6.

[1] Includes watch, clock and jewelry repairs, costume and dress suit rental and miscellaneous personal services related to clothing.

[2] Includes hotel accommodations, sporting and recreational camps, and overnight campsites.

[3] Includes maintenance services for appliances and house furnishings, moving and warehouse expenses, postage charges, premiums for fire and theft insurance on personal property less claims paid, and miscellaneous household operation services.

[4] Includes current expenditures of trade unions and professional associations, employment agency fees, money-order fees, spending for classified advertisements, and other personal business services.

[5] Includes inter-island and other waterway fares.

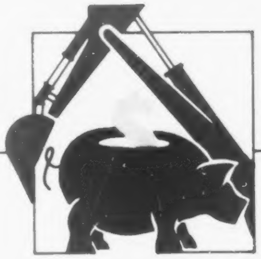
[6] Includes expenditures for pets and pet care services, photographic studies, film processing, and cable television.

[7] Includes fees paid to commercial business, trade, and correspondence schools, and for educational services not elsewhere classified.

Note: Consumer durable goods are designated (d.) nondurable goods (n.d.), and services (s.).

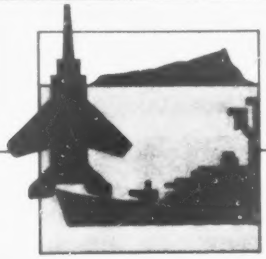
GROSS STATE PRODUCT

PERSONAL ACCOUNT

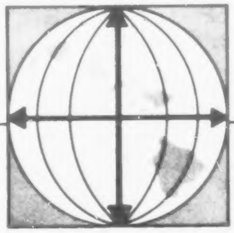


SAVINGS AND INVESTMENT

STATE AND LOCAL GOVERNMENT



FEDERAL GOVERNMENT



EXTERNAL ACCOUNT

3. SAVINGS AND INVESTMENT ACCOUNT

The Savings and Investment (S&I) Account is the second of five sectors whose components make up Gross State Product (GSP) of the Hawaii Gross State Product Accounts (GSPA). All of these sectors, except the Federal Government, yield a residual—an excess of income over expenditures which represents a form of savings. It is through the use of these savings that Hawaii's businesses and homeowners purchase their assets.

The S&I Account is similar to the Gross Savings and Investment Account of the U.S. Department of Commerce National Income and Product Accounts (NIPA). Within the GSPA framework, the S&I Account has four sources of income—the residuals of the Personal (personal saving), and State and local Government (Government surplus or deficit (-)) Accounts; undistributed profits of Hawaii corporations and capital consumption allowances from within the business community.

Personal savings and government surplus or deficit are discussed in the Personal and State and local government sectors, respectively.

Undistributed profits represents the profits of Hawaii corporations after State and Federal corporate profits tax liabilities and dividends to stockholders have been paid. In the GSPA framework, profits are defined as total corporate receipts less allowable deductions associated with the current period, adjusted from fiscal to calendar year, if necessary.

Hawaii corporations are defined to include both businesses incorporated in Hawaii and Hawaii operations of businesses incorporated elsewhere. The estimates for 1958 to 1977 are based on data in *Hawaii Income Patterns: Corporations* published by Hawaii State Department of Taxation and 1978 to 1985 are preliminary estimates based on analysis of relationships in the earlier period and current data on corporate profits tax collections and dividends paid.

Capital consumption allowance consists primarily of depreciation but also includes capital outlays charged to current expense and accidental damage to fixed capital. Estimates include domestic and foreign corporations, financial institutions, partnerships, sole proprietorships, and owner-occupied housing. Depreciation measures the wear and obsolescence of fixed capital. Data sources include *Hawaii Income Patterns: Corporations, Sole Proprietorships and Individuals* and *State of Hawaii Data Book*.

On the expenditure side of this sectoral account is gross investment, showing the uses in which these savings are channelled. The three components are gross private domestic investment, and two residuals—discrepancy and omissions, and net external account balance.

Gross private domestic investment includes estimates for fixed investment (non-residential and residential structures, and producers' durable equipment) and change in inventories.

Private producers' durable equipment estimates are based on annual reports to stockholders or government agencies, and surveys of businesses for the 1958 to 1975 period, and for later years using a limited survey and analysis of the relationships among Hawaii's purchases of equipment, U.S. purchases of equipment, and corporate income tax collections. This estimate, therefore, excludes household purchases of equipment as well as those by State and local and Federal Governments. Details may be found in their respective sectors.

For the 1958 to 1977 period the estimate of change in inventories is based on *Hawaii Income Patterns: Corporations* and is calculated as the difference between the reported beginning and ending inventories, adjusted to calendar year basis, if necessary.

The remaining components of expenditures—discrepancy and omissions are net external account balance—are residuals of the Gross State Product and External Account, respectively, and are discussed therein.

4. STATE AND LOCAL GOVERNMENT ACCOUNT

The State and Local Government (SLG) Account is the third of five sectors whose components make up Gross State Product (GSP). The U.S. Department of Commerce National Income and Product Accounts' (NIPA) comparable government data are presented in the Government Receipts and Expenditure Account as one sector with State and local, and Federal Government data. The Hawaii Gross State Product Accounts (GSPA), however, presents summary and detailed data for the Federal Government in Hawaii as a separate account.

The SLG income and expenditure tables are presented as four series of seven—State and local combined, State of Hawaii, total county and each county individually. The SLG sector contains more than 50 percent of the tables in GSPA and will facilitate the comprehensive analysis required for policy making.

The SLG sources of income are the taxes and non-taxes levied on resident individuals and corporations or non-residents earning income within their boundaries, and grants from the Federal Government.

These taxes and non-taxes may be collected from individuals (e.g., income tax, inheritance tax, drivers' license fees, or University of Hawaii tuition), corporations (corporate profits tax), other businesses (e.g., excise taxes on gross receipts, liquor and alcohol, property taxes, and permits) or proportionately from employers and employees for State social insurance progams (e.g., retirement). Unemployment insurance is a cooperative Federal-State program and in earlier HIE studies was shown in both SLG and Federal sectors. Following the NIPA convention, it is now included in the Federal sector with separate data presented for either program.

Sources of information for the State of Hawaii Government receipts are the Hawaii Department of Accounting and General Services' *Annual Financial Report*, and *State Employees' Retirement System Annual Reports*, and for county government receipts, their respective *Finance Director's Annual Reports*.

This income is then used for the purchases of goods and services, transfer payments to persons, interest payments and subsidies to business, less current surplus of government enterprises.

The SLG Account had been significantly revised for the 1985 publication and this update follows the methodology adopted at that time. Detailed discussion may be found in Appendices l and 2 of that publication. Fiscal year 1985 estimates are presented herein and calendar year 1983 estimates have replaced the fiscal year 1983 data.

Transfer payments are generally a State rather than county expenditure and include benefits paid from State retirement fund and aid to families with dependent children (AFDC).

Net interest paid also follows the NIPA convention of showing the interest paid by government for use of borrowed money less interest earned. In earlier years, interest earned was shown explicitly as an income. This item is usually negative as government generally borrows for construction and large equipment purchases, which exceeds the interest earned by government.

Subsidies are payments to business for which no goods or services are provided in return, and by economic accounting convention, the current surplus of government enterprises are subtracted. By GSPA definition, the only government enterprises are the county boards of water supply.

If expenditures in any given period exceed income, the shortfall or deficit is met by borrowing; if revenues exceed expenditures, a surplus accrues. Showing each of the government's income and expenditure items separately also recognizes that some sources of income may be used by all or several levels of government (e.g., excise taxes, income taxes) while some are either constitutionally or traditionally used by Federal (e.g., customs collections), State (e.g., University tuition) or counties (e.g., property tax) alone. Expenditures may vary also (e.g., Federal Government provides National Defense; the State of Hawaii, education; and the counties, water supply).

Table 4-1.

[1] Net of refunds.

[2] Includes State retirement system in "Other government".

[3] Current surplus calculated as operating revenues less operating expenditures of county water supply.

Tables 4-2 through 4-8.

[1] Net of refunds.

[2] Greater detail may be found in Tables 4-9 through 4-15.

[3] Greater detail may be found in Tables 4-16 through 4-22.

[4] Greater detail may be found in Tables 4-23 through 4-29.

[5] Subsidies are payments to business for which no good or service is received in exchange; current surplus is calculated as operating revenues less operating expenditures; and according to GSPA definition, the county water supply systems are the only State or local government enterprise.

Tables 4-9 through 4-15.

[1] Net of refunds.

[2] Includes University of Hawaii system, and secondary and elementary summer school tuition and fees.

[3] In 1958 includes the Territory general excise tax and the county gross income tax; for all other years includes the State general excise tax.

[4] Includes revenues from the boxing gate-tax for 1958 and 1959, and the conveyance tax starting in 1966.

[5] Includes private sources, sales of property and storehouse supplies, borrowing, repaid loans, and other miscellaneous revenues.

Tables 4-16 through 4-29.

[1] Old-age, Survivors Disability and Health Insurance (Social Security) includes State and county governments' contributions on behalf of their employees.

[2] A joint State-Federal program, defined in GSPA as a Federal program; includes the State and county governments' contributions on behalf of their employees.

[3] Includes administration costs and payments made directly to providers (e.g., medical care, housing). Cash welfare payments to persons are shown below as Transfer payments to persons.

[4] Includes the capital (equipment and construction) expenditures. Wages and salaries, and other current expenditures are shown under government enterprises.

[5] Includes only the operating expenditures of county water supply, by GSPA definition.

[6] For 1958 to 1960, only county expenditures are included; State is included in health and hospitals.

[7] Includes Territory or State sanitation and waste removal from 1958 to 1960.

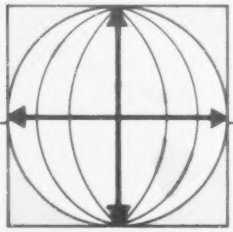
FEDERAL GOVERNMENT



EXTERNAL ACCOUNT

5. FEDERAL GOVERNMENT ACCOUNT

The Federal Government Account is the fourth of the five sectors whose income and expenditure components make up Gross State Product (GSP).

The U.S. Department of Commerce National Income and Product Accounts (NIPA) generally present data for Federal Government combined with the State and Local Government. Hawaii Gross State Product Accounts (GSPA), however, recognizes the importance of Federal Government, especially Federal defense expenditures, to Hawaii's economy and separates them. GSPA has defined some part of the Federal Government to be "External" to the Hawaiian economy. This recognizes that although some activities of the Federal Government occur in Hawaii and affect the residents of this State, the policy making body and treasury are elsewhere. Discussion of this definition may be found in earlier HIE reports by Professor Harry Oshima, Professor Y. C. Shang, and others cited in the References.

This Account records as income to the Federal Government in Hawaii the revenues from persons, corporations, business, contributions of employers and employees to the Federally-sponsored social insurance programs, and transfers from the Federal Government in Washington, D.C.

The taxes paid by individuals include the individual income tax, estate and gift taxes, while corporations pay the corporate income tax. The indirect business taxes are levied on goods and services such as excises on gasoline, liquor, tobacco, and telephone service, or customs collections on imported goods.

The social insurance programs sponsored by the Federal Government include OASDHI (Social Security), Employees' Retirement, and Unemployment Insurance (UI) for civilians and military. UI is a joint Federal-State program and the previous HIE adopted the NIPA convention and presents the program in this Account with separate entries for each. This update continues that convention.

Transfers from Washington, D.C. is the residual or balancing item between the income and expenditures of the Federal Government activities in Hawaii. It is assumed that any shortfall is transferred to Hawaii from the central government.

The data for Federal Government tax receipts are published in the *Annual Report of the Commissioner of Internal Revenue* and the *Annual Report of the Secretary of the Treasury* for customs collections. Sources for social insurance programs include *Unemployment Insurance Fact Book*, published by State of Hawaii Department of Labor and Industrial Relations; U.S. Department of Commerce, Bureau of Economic Analysis (BEA) State Personal Income statistical series; and the Treasury report above.

The expenditures of the Federal Government in Hawaii include purchases of goods and services, transfer payments to persons, grants to State and local governments, interest paid and subsidies, less current surplus of government enterprises.

The purchases of goods and services are shown for defense and non-defense with detailed expenditures of each for compensation of employees (defense—military and civilian; non-defense, civilian only) and other expenditures (e.g., construction). The estimates of wages and salaries are based on unpublished detail of the BEA State Personal Income, and other purchases of goods and services are provided by the fiscal offices of the various agencies.

Transfers to persons and non-profit institutions are those payments for which no goods or services are provided in exchange. They include such programs as OASDHI, Federal employees' retirement, food stamps, educational assistance, and unemployment compensation for civilian and military.

Sources include the BEA State Personal Income unpublished detail and *Unemployment Insurance Fact Book*.

Grants paid to State and local government is estimated in the SLG Account and is the sum of all Federal grants as listed in *Finance Director's Annual Report* (counties) and *Annual Financial Report* and U.S. Department of Commerce Bureau of Census worksheets for *State Government Finances.*

Following the NIPA convention net interest is interest paid on government bonds and certificates less interest earned. It is assumed that interest earned goes directly to Treasury and none remains in Hawaii. The source is the Treasury report cited above.

Subsidies are payments to business for which no good or service is provided in return. They have included payments to agriculture or airline carriers. Estimates are based on Hawaii Department of Agriculture's *Agricultural Statistics* and annual reports of airlines.

Again following NIPA convention, from subsidies is subtracted the current surplus (total operating expenditures less revenues) of government enterprises. By GSPA definition these include the U.S. Postal Service and the military exchange system. The U.S. Postal service revenues are reported by the Postal Service; and expenditures, *Federal Government Outlays in Hawaii* and BEA unpublished Personal Income detail. Data on military exchange system is collected by the Hawaii Department of Business and Economic Development, Research and Economic Analysis Division's survey of the exchanges and BEA unpublished Personal Income detail.

FOOTNOTES TO FEDERAL GOVERNMENT ACCOUNT

Table 5-1.

[1] Net of refunds.

[2] This is the balancing item between Federal Government Expenditures in Hawaii and Federal tax and nontax revenues from Hawaii. It is assumed to be transferred from the central government.

Table 5-2.

[1] Discontinued in 1960 and reinstated in 1970.

[2] Such as excise taxes on diesel fuel, recreation, wagering and others.

[3] Available only on a fiscal year basis when refunded not for fiscal year when tax liability originally incurred.

[4] A joint Federal-State program, defined in this update as a Federal program.

[5] This is the balancing item between Federal Government Expenditures in Hawaii and Federal tax and nontax revenues from Hawaii. It is assumed to be transferred from the central government.

[6] Includes trade adjustment allowances and public service jobless benefits.

Table 5-3.

[1] Includes other current expenditures, equipment and construction. See table 1-3 for greater detail.

[2] Includes pensions and compensation, and payments to disabled for specially adapted housing and autos.

[3] Includes educational pay to veterans for subsistence and readjustment, and educational assistance to wives and dependents, including war orphans and other children.

[4] Includes terminal leave and mustering out payments.

[5] Includes Panama Canal and Black Lung payments.

[6] Includes payments to railroad employees, trade readjustment allowances, and public service jobless benefits.

[7] Includes basic benefits and hold harmless payments.

[8] Includes education exchange, Alaska claims, public safety officers' survivors, education and training, medical vendor payments, CHAMPUS, $50 Federal Tax Refund (1975) and energy assistance.

EXTERNAL ACCOUNT

6. EXTERNAL ACCOUNT

The External Account is the last of the five sectors whose income and expenditure components make up Gross State Product (GSP).

The External Account is similar in format to the Foreign Transactions Account of the U.S. Department of Commerce National Income and Product Accounts (NIPA). It is similar in concept, also—estimate the value of transactions between residents (individuals, businesses and governments) and non-residents. In NIPA, a resident is a U.S. citizen and non-residents are considered foreigners; in Hawaii Gross State Product Accounts (GSPA), however, the distinction is also between Hawaii residents and non-residents—who include citizens of foreign countries and also the U.S. Mainland. As was discussed in the Savings and Investment (S&I) Account, the GSPA definition of residency as applied to businesses includes not only those firms incorporated here but also Hawaii branches of firms incorporated elsewhere.

The transactions within the External Account are considered from the vantage point of a non-resident. Therefore, income is received by a non-resident for the sale of a good or service imported by a Hawaii resident. Conversely, an expenditure is made by a non-resident (which is income to a Hawaii resident) for a Hawaiian export. These exports may be goods (e.g., pineapple) or services (e.g., financial counseling). They may be consumed elsewhere (e.g., anthuriums shipped to Japan) or consumed here (e.g., Mainland visitors who purchase hotel accommodations or Aloha shirts).

The format of the External Account has undergone no revisions from the last publication of the HIE, although significant changes have been made in the data used to estimate domestic waterborne imports.

Sources of the income earned by the rest of the world for Hawaii's imports include merchandise imports from the U.S Mainland and from foreign countries whether they arrive by air or ship. These include such items as automobiles, foodstuffs, and crude petroleum. Hawaii also imports services (e.g., business services and transportation services) and the "service" of investments made here by Mainland and foreign owners, represented by the category "Income from investments."

Hawaii residents also import educational services (e.g., Mainland colleges) and travel services (e.g., a vacation to Las Vegas) that are consumed elsewhere.

Unilateral transfer payments are cash or commodities that are sent to non-residents for which no goods or services are received in exchange.

The balancing item for the External Account is Net External Account Balance which measures the difference between the estimated values of total exports and imports.

The relative magnitude of this item, however, should not be viewed as an exact indicator for surplus or deficit in the current account as in the case of the national balance of the payment account. As a balancing item, the value of Net External Account Balance shows not only the difference between total imports and exports in the current not capital account, but also statistical errors inherent in the estimating methods for the exports and imports sides of the account.

In recent years, especially after 1980, there have been sharp fluctuations in the value of Net External Account Balance as shown in Table 6-1. This reflects mostly the sharp fluctuations in Hawaii's merchandise imports and exports caused by the fluctuations in the business and construction activity cycles such as the building boom of 1979-80 and the subsequent decline in the 1982-83 period.

Any changes in the current account balance would result in corresponding changes in the capital account. Thus, there seems to be no reason to be overly concerned with the fluctuation in the current account balance. Unfortunately, there is insufficient data on the flow of capital transactions to allow construction of a capital account as part of the GSPA accounts. In the event that the capital flow between Hawaii and the rest of the world can be estimated in the future, a more accurate estimate of the current account balance could, therefore, be obtained.

The estimates of imports are based on commodity flows reported by Hawaii Department of Transportation *Air Traffic Summary,* U.S. Army Corps of Engineers *Waterborne Commerce of the U.S.* and U.S. Department of Commerce, Bureau of the Census *U.S. Foreign Trade Statistics.* Imports of services' data is obtained chiefly from Bank of Hawaii's *Annual Economic Review,* supplemented by Hawaii Visitors Bureau estimates of Hawaii residents travel out-of-state, and extrapolated for recent years.

Expenditures on Hawaii's exports show detail for those of primary importance to the economy (e.g., sugar and pineapple) and those of less yet growing importance. These include garments, tuna, flowers, papaya, macadamia nuts, coffee, other agricultural products, processed foods and fuel. Hawaii also exports services—transportation, business services and the use of capital owned by Hawaii residents and exports to visitors.

The sources of information include the Waterborne Commerce publication cited above, and various publications of the Hawaii Department of Business and Economic Development, and Hawaii Visitors Bureau.

Unilateral transfers to persons in Hawaii from outside the State are payments for which no good or service is exchanged. This information is available from *Annual Economic Review.*

The final expenditure is transfers from Federal Government in Washington, D.C. It is the balancing item in the Federal Government sector and is discussed therein. As was discussed above, some activities of the Federal Government are "external" if expenditures in Hawaii exceed revenues collected here and it is this shortfall that is considered an export.

FOOTNOTES TO EXTERNAL ACCOUNT TABLES

Table 6-1.

[1] Seen from the perspective of a non-resident; income is earned by non-resident for Hawaii's imports of goods and services; expenditures are made by a non-resident for Hawaii's exports of goods and services.

[2] This is the balancing or "residual" item between total exports and the sum of receipts from Hawaii's imports and unilateral transfer payments to persons.

[3] Indicates the relative importance; primary includes sugar, fresh and processed pineapple; secondary includes garments, canned tuna, flowers, papaya, macadamia nuts, coffee, other agriculture and scrap metal. Greater detail may be found in Table 6-3.

[4] Is the balancing item in the Federal Government Account between Federal Government Expenditures in Hawaii and Federal tax and non-tax revenues from Hawaii. It is assumed to be transferred from the central government.

Table 6-2.

[1] Detailed data for 1958 domestic imports were not available and detailed estimates are based on 1959 distribution applied to the 1958 total.

[2] Seen from the perspective of a non-resident; income is earned by a non-resident for Hawaii's imports of goods and services. Greater detail for Domestic Imports 1976 to 1985 may be found in Table 6-5, and in Table 6-6 for Foreign imports.

[3] Airborne domestic imports, 1976 to 1985, were estimated using value per ton results from selected, generally high valued categories from estimates of waterborne imports plus information about air-flown fresh agricultural products.

[4] Not differentiated between waterborne and airborne. Greater detail for 1976 to 1985 may be found in Table 6-6.

[5] Is the balancing item or "residual" between total exports and the sum of receipts from Hawaii's imports and unilateral transfer payments to persons.

Table 6-3.

[1] Seen from the perspective of a non-resident; expenditures are made by a non-resident for Hawaii's exports of goods and services.

[2] Indicates the relative importance.

[3] Includes ginger root, meat, live animals and seed corn.

[4] Includes fish, milk products, grains, feeds and oils.

[5] Includes chemicals, rubber products, lumber, pulp and paper, metal and metal products, and mechanical, electrical, and transportation machinery.

[6] Greater detail may be found in Table 6-4.

[7] Is the balancing item in the Federal Government Account between Federal Government Expenditures in Hawaii and Federal tax and non-tax revenues from Hawaii. It is assumed to be transferred from the central government.

Table 6-4.

[1] Total visitor personal consumption expenditures for 1958 to 1985 (line 1) are final; detailed visitor personal consumption expenditures by type (lines 2 through 55) are subject to revision for 1984 and 1985.

Note: Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s).

Table 6-5.

[1] Estimates are preliminary for 1985. Domestic Imports, Waterborne detail are based on adjusted Corps of Engineers tonnage data.

Table 6-6.

[1] After 1979, foreign imports are "Imports for Consumption" rather than "General Imports."

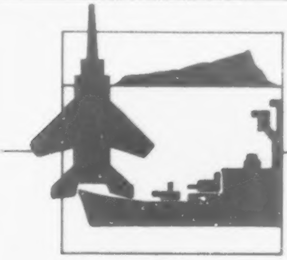
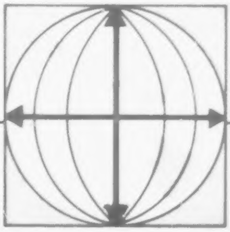
STATE AND LOCAL GOVERNMENT



FEDERAL GOVERNMENT



EXTERNAL ACCOUNT

GLOSSARY

BEA—Is the abbreviation used for U.S. Department of Commerce, Bureau of Economic Analysis.

BLS—Is the abbreviation used for U.S. Department of Labor, Bureau of Labor Statistics.

Business Transfer Payments—Those made by the business sector to persons for which no goods or services are provided in exchange. Major items included are corporate gifts to nonprofit institutions, consumer bad debts, and personal injury payments by business to persons other than employees. Estimates of unrecovered cash and capital assets, and cash prizes are also included.

Capital Consumption Allowances—Consist of depreciation; capital outlays charged to current expense and accidental damage to fixed capital.

CETA—Comprehensive Employment and Training Act grants made by the Federal Government to State and local governments. In GSPA's State and Local Government Account, the wages and salaries paid to persons in this program are considered "other current expenditures" as these persons are outside the civil service personnel administration.

Change in Inventories—Represents the change in the value of goods held by the business sector (valued in current period prices) compared to the previous year. An inventory increase is regarded as an investment because it represents production of the current period, even though that production is not sold by the end of the period. Change in inventories would be positive if either the value increased due to a greater quantity of equal-price goods held or due to a greater price on equal-quantity goods.

Charges Against Gross State Product (GSP)—Comprises the current dollar value of all goods and services produced by Hawaii in a given calendar year, as measured by the flow of incomes to the factors of production that are responsible for this output. It is the sum of compensation of employees, proprietors' income, rental income, corporate profits before taxes, net interest, business transfer payments, indirect business taxes less subsidies, and capital consumption allowances.

Compensation of Employees—Includes wage and salary payments before deductions, the employers' contributions on the employees' behalf to government-sponsored retirement, and to private health and welfare funds.

Constant Dollars—Estimates the value of a transaction after adjusting for inflation. All estimates are in 1982 dollars.

Corporate Profits—Is the before tax difference between corporate receipts and allowable deductions. It is the sum of State and Federal corporate profits tax, dividends, and undistributed profits.

CPI—Is the abbreviation used for Consumers' Price Index.

Defense Expenditures—Includes all expenditures by the U.S. Government in Hawaii for National Defense. It includes compensation of civilian and military employees of the Department of Defense and other defense expenditures (e.g., construction).

Depreciation—Measures the wear and tear and obsolescence of fixed capital, based on accounting principles and practices used for tax purposes. Ideally, this estimate would be based on economic rather than accounting depreciation to reflect the re-sale value of such capital.

Discrepancy and Omissions—Is the balancing item between Gross State Product estimated as the sum of Charges (incomes) or of Expenditures. It may be positive (if Expenditures are less than Charges) or negative (if Expenditures are greater than Charges). It has no economic significance.

Disposable Income—Measures that component of personal income that is available, after payment of Federal, State and local personal taxes, for personal outlays or personal savings.

Domestic Imports—Includes those goods Hawaii imports from the Mainland (e.g., automobiles, food products, etc.), either by surface shipment (waterborne) or by air.

Durable Goods, Consumers'—Includes consumer items with a normal life expectancy of three years or more, such as automobiles, furniture, and household appliances.

Economic-Functional Expenditure Classification, State and Local—Government expenditures are broken down by purpose for which these expenditures are made (e.g., general government, education, recreation, etc.).

Education, State and Local—Expenditures for the operation and the planning, construction, improvement, and maintenance of public school facilities and grounds. This includes the university system, secondary and elementary schools, adult education, vocational and special education programs. Act 97 passed by the Legislature in 1965 transferred these functions from the county level to the State government. However, the counties operate and maintain a bus transportation service for student excursions and field trips.

Employers' Contributions for Social Insurance—Composed of employers' contributions on behalf of their employees to State and Federal Government programs. It is a component of Supplements to Wages and Salaries. The State programs include the employees' retirement system (operated by the State, and open to State and county employees), and Workers' Compensation. The Federal programs include OASDHI (social security) and the employees' retirement system. Unemployment Insurance is a joint Federal-State program, but following the National Income and Product Accounts' conventions, it is defined here as a Federal Program.

Expenditures on Gross State Product—Comprises the value of the purchase of goods and services by persons and State and local and Federal governments, gross private domestic investment (including the change in inventories), and net exports (exports of goods and services less imports).

External Account—Depicts all transactions between Hawaii residents (whether persons, businesses, or governments) and non-residents. These transactions may take place in Hawaii (visitor expenditures, sale of fuel to trans-Pacific airlines) or on the Mainland (domestic) or foreign countries.

Federal Employees' Retirement—Composed of employers' and personal contributions to the Federal employees' retirement fund.

Federal Government Account—Records the economic activity of U.S. Government agencies in Hawaii. It is considered separately from the State and local government as it has different sources of income, responsibilities, and policy-making centers.

Federal Tax and Non-Tax Revenues—Is the total of Federal taxes and other revenues collected each fiscal year less refunds paid during that period; the data are then converted to calendar year.

Fixed Investment—Measures additions to and replacement of private capital through acquisitions of nonresidential structures and private producers' durable equipment and residential structures.

Foreign Travel and Other, Net—Is calculated as the difference between out-of-State travel of Hawaii residents, and visitors and crew expenditures in Hawaii. Due to the relatively large expenditures of visitors, it is negative throughout the 1958 to 1985 period.

General Government, State and Local—Includes activities or expenditures of the Legislative and Judicial branches, and some functions of the Executive branch of government. This function includes expenditures for staff agencies such as the accounting office, budget office, purchasing office, tax office, and data processing. Act 97 passed by the Legislature in 1965 transferred the administration and operation of the district courts from the counties to the State government.

GNP—Is the abbreviation used for Gross National Product.

Government Enterprise—Is a government-owned and operated water supply, electric light and power, gas supply, transit system, military exchange system, or postal system which obtains at least 50 percent of its operating revenues from user charges. Under this definition, the only State and local enterprise is water supply, and Federal enterprises are military exchanges and the U.S. Postal Service.

Government Interest, Net—Estimates the difference between interest earned by State and local and Federal Governments for funds held by financial institutions, etc., and the interest paid by government for the use of borrowed funds. It is assumed that all Federal Government interest is earned by the central government, and therefore, none is earned in Hawaii.

Grants-in-aid to State and Local Government, by Federal—Are Federal grants-in-aid payments to State and county governments including general revenue sharing, aid for defense, public welfare, education, highways, medical care, air transportation, housing and community development, agriculture, administration of employment security, and other purposes.

Gross Investment—Are the total transactions in the Savings and Investment Account as measured on the expenditure side. It includes gross private domestic investment (fixed investment and change in inventories), discrepancy and omissions, and net external investment.

Gross Savings—Are the total transactions in the Savings and Investment Account as measured on the income side. It includes personal saving , undistributed profits, capital consumption allowances, and State and local government surplus or deficit.

GSP—Is the abbreviation used for Gross State Product. It represents the value of final goods and services produced in a state economy.

GSPA or GSP—Is the abbreviation used for Hawaii Gross State Product Accounts.

Health, State and Local—Are activities or expenditures by government for public health services, excluding hospital care. This governmental function includes such aspects of public health care as communicable disease control, health centers, clinics, and laboratory services.

Implicit Price Deflator, GSP—Is the indicator of price change for Gross State Product (GSP), and is the ratio of GSP in current prices to GSP in constant prices. It is the weighted average of the price indices used to deflate the components of GSP expenditures in the current period. All expenditures are valued in prices of the base year, 1982, to obtain the constant dollar GSP. Similar deflators are calculated for components of GSP.

Indirect Business Tax, Federal—includes alcohol, tobacco, stamp, manufacturers', retailers', and miscellaneous Federal excise taxes as well as customs collections. All taxes are net funds made during the year. The data are published by fiscal year but converted to calendar year.

Indirect Business Tax and Non-Tax, State and Local—Consists of those tax payments paid by business, other than employers' contributions for social insurance and corporate profits taxes. Excise taxes and real property taxes paid by businesses are the principal types of indirect taxes. Hawaii's Income and Product Accounts, by definition, consider all property taxes as indirect business tax. Indirect business non-tax payments consist of those amounts of money paid by business that are for licenses, permits, royalties, and concessions. The data are published by fiscal year but converted to calendar year.

Interest Paid by Consumers to Business—Estimates the payments to financial institutions or retailers for the privilege of buying on credit. It includes interest on purchases of consumer durables such as automobiles and household appliances, or general purchases made with bank charge cards. It does not include interest on mortgages or home improvements which are considered business interest.

Merchandise Imports or Exports—Includes foreign and domestic farm products, processed foods and feeds, petroleum, metallic, non-metallic, paper, and chemical products, machinery, and manufactured goods, whether they are transported by sea or air. An estimate is made of containerized cargo for which no itemization is available.

Miscellaneous Exports—Are those products exported by Hawaii that are not historically of primary or secondary importance; including refined oil products.

Miscellaneous (Expenditures or Revenues), State and Local—Are all transactions which are not classified elsewhere in any specific government function. This governmental function includes such activities as airports, harbor facilities, housing and urban renewal, training grants through CETA, economic opportunity grants, revenue sharing, economic development and assistance, mass transit and planning grants, and motor pool operations.

Net Exports—Is calculated as the difference between the value of exports of goods and services and the value of imports of goods and services. Imports are excluded here from the computation of Expenditures on Gross State Product because they were included in the purchase of the end-user (e.g., a Japanese automobile is included in personal consumption expenditures if purchased by a household, and in State and local government expenditures if purchased for use by a State agency).

Net External Account Balance—Is the balancing item in the External Account, and is on the Imports side. It is calculated as the difference between Total Exports (exports of goods and services, unilateral transfer payments to persons outside Hawaii, and transfers from Federal Government in Washington, D.C.) and estimated Imports (imports of goods and services and unilateral transfers to persons in Hawaii).

Net Interest Income—Measures the excess of interest payments made by the domestic business account over its interest receipts from the Personal Account, plus net interest received from abroad. In addition to monetary interest flows, net interest includes flows of interest in kind (imputed interest). Interest paid by one individual to another is a transaction within the personal account and has no effect on the overall interest payments or receipts of the account.

Net Interest Paid, Federal—Is the estimate of interest on savings bonds paid by the Federal Government to residents of Hawaii, assumed to be paid to households exclusively.

Net Interest Paid, State and Local—Consists of interest payments, less any interest income, for the use of borrowed money. It includes interest paid and earned by government enterprises (water supply) and other government.

Net State Product—Is Gross State Product (GSP) less capital consumption allowances. It is perhaps, a better measure of new production than GSP as it excludes the replacement of worn-out or obsolete capital.

Net Transfers from Federal Government in Washington, D.C.—Is the difference between Federal Tax and Non-Tax Revenues collected in Hawaii, and Total Expenditures by the Federal Government in Hawaii (purchases of goods and services, transfers to persons, grants-in-aid to State and local government, net interest paid, and subsidies less current surplus of government enterprises). It is assumed to be transferred from the central government.

New Private Construction Authorizations—Include the estimated cost of construction plus the value of equipment generally considered to be an integral part of the structure and included in the contract price, including architectural and engineering expenses, and "in-house work." In earlier Hawaii Income and Product Accounts, this was used as the estimate of Investment in residential and nonresidential structures. In this update, structures are estimated by an improved method, and this table is presented for user's information.

NIPA—Is the abbreviation used for the (U.S. Department of Commerce) National Income and Product Accounts.

Non-Defense Expenditures—Includes all expenditures by the U.S. Government in Hawaii other than those for National Defense. It includes compensation of civilian employees and other expenditures, and by such agencies as Departments of Agriculture and Commerce, Federal Aviation Agency, and Federal Communications Commission.

Non-Durable Goods, Consumers'—Are personal items which generally last for only a short time (three years or less), such as food, beverages, clothing, shoes, and gasoline.

Nonprofit Institutions—Provide services primarily to persons (e.g., hospitals, schools) and are included in the Personal Account, with detail as to their transactions with business, government, and external sectors provided, as available.

Non-Taxes—Includes those revenues of State and local goverments from licenses, permits, rents and royalties.

OASDHI—Is an estimate of contributions to the Federal Government Old-Age, Survivors' Disability, and Health Insurance (Social Security) program. It includes those contributions made by an employer on employee's behalf, payments by employed persons themselves, and payments by the self-employed.

Operating Expenditures (of government enterprises)—Includes the wages and salaries and other current expenditures (e.g., electricity, gasoline, etc.) of county water supply; and the compensation of employees, and other current expenditures of the U.S. Postal Service and military exchange system in Hawaii. Capital expenditures are included in miscellaneous expenditures of other government.

Operating Revenues (of government enterprises)—Includes receipts from sale of services by county water supply and U.S. Postal Service; and the sales of goods and services by the military exchange system in Hawaii.

Other Expenditures or Receipts—Are those expenditures or receipts to the State and local government which are not included in the Hawaii Gross State Product Accounts' definition of income from current production. They include intergovernmental transfers between the State and counties, land and bond principal.

Other Government—Indicates all interest paid or received by State and local government excluding government enterprises (i.e., water supply) and social insurance funds (i.e., State retirement).

Other Labor Income—Includes such items as employer payments for private pension, health and welfare funds, compensation for injuries, directors' fees (and, until 1976 National Income and Product Accounts revisions, pay of military reserves which are now included in wages and salaries).

Other Taxes—Includes State and local government revenues from personal taxes (delinquent, and motor vehicle weight) and indirect business taxes (franchise, gate, conveyance, insurance companies, motor vehicle weight, public service companies, and public utilities).

Out-of-State Expenditures by Hawaii Residents—Includes those Mainland and foreign purchases of travel (air fare, hotels, meals, etc.) and education of Hawaii residents.

Payments for Hawaii's Exports of Goods and Services—Are payments for the sales of goods and services made to the Hawaiian economy by non-residents. It includes merchandise exports at free alongside ship price, ocean and air fares, insurance, profits earned by Hawaiian business firms operating abroad, earnings received from Hawaiian assets abroad, and visitor and crew expenditures within the State.

PCE—Is the abbreviation used for Personal Consumption Expenditures.

Personal Account—Records the economic activity of persons, nonprofit institutions, associations, and clubs as income receivers or purchasers of goods and services, and as savers.

Personal Consumption Expenditures—Reflect the market value of the goods and services purchased by individuals and nonprofit institutions, or acquired by them as income-in-kind in the State of Hawaii; out-of-State expenditures of Hawaii residents are then added, and expenditures of visitors and airline crews are subtracted. The rental value of owner-occupied dwellings is included, but not the purchases of dwellings. Purchases are recorded at cost to consumers, including excise or sales taxes, and in full at the time of purchase, whether made with cash or credit. The nonprofit institutions included are those rendering services primarily to individuals. It corresponds to the "net personal consumption expenditures" item of previous Hawaii's Income and Expenditure Accounts studies.

Personal Consumption Expenditures in Hawaii—Corresponds to the "personal consumption expenditures" items of previous Hawaii's Income and Expenditure Accounts studies. It estimates the sales of goods and services (by civilian and military establishments) within the State without distinction as to whether the purchaser is a Hawaii resident or visitor.

Personal Contributions for Social Insurance—Estimates that component of income that is withheld from employees' paychecks and deposited on their behalf in government-sponsored social insurance programs (e.g., State retirement, OASDHI, Federal retirement).

Personal Income—Is that received by all individuals in the (Hawaiian) economy from all sources. It is made up of wages and salaries, other labor income, and the difference between transfer payments and personal contributions for social insurance (OASDHI and other State and local, and Federal government programs).

Personal Interest Income—Is the sum of all interest earned by Hawaii residents whether from business, government, or out-of-State sources.

Personal outlays—Includes personal consumption expenditures (on goods and services), interest paid to business, and unilateral transfers to persons outside Hawaii.

Personal Savings—Includes current savings of individuals (including the savings of sole proprietorships and partnerships), nonprofit institutions and private, personal, health, welfare and trust funds. These savings may be in the form of cash, deposits, security holdings, indebtedness, reserves in life insurance and mutual savings institutions, net investments of unincorporated enterprises, and acquisition of real property net depreciation. It is the balancing item in the Personal Account.

Personal Tax Payments, Federal—Are tax payments by persons, net of refunds, that are not chargeable to business expenses, and include individual income, estate, and gift taxes.

Personal Tax and Non-Tax Payments, State and Local—Are the taxes levied on personal income or personal property for support of government and public services net of refunds. Personal non-tax payments are those required of any individual who receives or abuses certain governmental services or public privileges which are subject to government authority or regulation. Personal non-tax payments by individuals are fees (e.g., examination fees), permits (e.g., fishing permit), fines (e.g., traffic tickets), and licenses (e.g., vehicle licenses). By definition, real property tax is included in indirect business tax.

PPI—Is the abbreviation used for Producers' Price Index.

Price Indices—Are ratios of the value of a basket of goods and services at current prices to the value of identical items at the constant prices of a fixed year (for GSPA and NIPA…1982). It expresses the average price level of the current year as a percent of prices in the fixed year. The Consumer Price Index (CPI) is the most widely used.

Primary Exports—Estimates the value of those historically important agricultural products exported by Hawaii to the Mainland or to foreign countries. It includes sugar, molasses, fresh and processed pineapple.

Private Health, Dental, and Life Insurance—Estimates the employers' payment of premiums made on the employees' behalf and is considered as a component of other labor income.

Private Producers' Durable Equipment—Includes furniture and fixtures, cutlery and hand tools, various types of machinery, transportation equipment, and instruments with an average life exceeding one year that were acquired by the ultimate business user, including those for replacement.

Proprietors' Income—Measures the earnings of unincorporated businesses, proprietorships, partnerships, and producers' cooperatives—from their current business operations. It includes both farm and nonfarm businesses, but excludes capital gains and losses.

Public Safety, State and Local—Are activities related to the protection of people and property. Public-safety consists of police protection, fire protection, National Guard, protective inspection (regulatory), corrections and flood control.

Public Welfare, State and Local—Are activities which assist and support indigent persons contingent upon their needs. This function contains the general administration costs for such programs as health care, public welfare, and welfare administration. Payments remitted directly to vendors for medical care costs are included in public welfare. Cash payments to persons estimated under transfer payments to persons are "general assistance."

Purchase from Business—Includes the expenditures of State and local government for other than compensation of employees. It includes other current expenditures, equipment, and construction.

Purchases of Goods and Services, Federal—Covers military pay (including dependent allotments and income in kind), food and clothing furnished free, civilian pay (except for pay of employees of govermental enterprises—postal service and military exchanges), and the purchase of durable and non-durable goods and contractual services, including construction. Operating expenditures of governmental enterprises and purchases of land are excluded.

Purchases of Goods and Services, State and Local—Are final purchases of goods and services, and consist of compensation of employees and purchases from businesses for other current expenditures, equipment, and construction. The purchase of land and repayment of bond principal are excluded, by definition.

READ—Is the abbreviation used for Hawaii Department of Business and Economic Development Research and Economic Analysis Division.

Receipts for Hawaii's Imports of Goods and Services—Includes out-of-State purchases made by Hawaii residents, and imported goods at free-on-board value, travel expenses, ocean freight and marine insurance, and income of the rest of the world on their investment in Hawaii. It excludes Federal Government imports of goods.

Recreation, State and Local—Are expenditures for activities such as golf courses, water safety, municipal parks, city zoo, botanic gardens, nurseries, auditoriums, and the design and construction of park facilities.

Rental Income of Persons—Consists of money earned by persons from others' use of their real property, such as a house, store, or farm. This category also includes imputed net rent of owner-occupants of non-farm dwellings, and royalties received by persons from patents, copyrights, and rights to natural resources. It does not include rent and royalties received by corporations and governments.

Sanitation and Waste, State and Local—Are activities involving the removal and disposal of waste matter. These activities include waste collection and disposal, also sewage collection and disposal.

Savings and Investment Account—Records the investment activities of business enterprises, of households in their capacity as homeowners, the net activities of external investors, and the surplus of State and local government.

Secondary Exports—Estimates the value of those products of secondary importance (to sugar and pineapple) exported by Hawaii to the Mainland and to foreign countries. It includes garments, canned tuna, flowers, macadamia nuts, coffee, papaya, other agricultural products, and other miscellaneous products.

Services—Are intangible commodities such as medical care, haircuts, and other personal care, railway, bus and air transportation, and the use of housing. Following the National Income and Product Accounts' convention, it is calculated as total services consumed in Hawaii (by residents and visitors) less foreign travel, net (out-of-State expenditures by Hawaii residents less visitor and crew expenditures in Hawaii). Note: This method distorts the expenditure patterns somewhat by considering all visitor expenditures as services since they also purchase food and clothing. The separate data for residents (Table 2-6) and visitors (Table 6-4) avoid this distortion.

Services, Exports—Estimates the value of those services (e.g., transportation and business services) that are exported by Hawaii to Mainland and foreign purchasers.

Services, Imports—Estimates the value of those services (transportation and business services) that are imported by Hawaii from the Mainland or foreign purchasers.

Services, in Hawaii—Estimates that component of personal consumption expenditures on services consumed in Hawaii. It is calculated as the sum of sales of services (by civilian and military establishments) without distinction as to whether the purchaser is a resident or visitor.

Social Insurance Funds or Programs—Estimates the revenues or payments by the various programs sponsored by State (e.g., State retirement) or Federal Government (e.g., OASDHI or Unemployment Insurance).

State and Local Government Account—Records the economic activity of the State of Hawaii and county governments.

State and Local Tax and Non-Tax Revenues—Is the sum of personal tax and non-tax payments, corporate profit taxes, indirect business tax less subsidies, and employers' and employees' contributions for social insurance.

State Income—Represents the aggregate earnings which arise from the current production of goods and services, inclusive of taxes on those earnings. This consists of compensation of employees, proprietors' income, rental income of persons, and corporate profits (corporate profits taxes, dividends, and undistributed profits), and net interest.

Total Revenues, GSPA—Estimates the total receipts of State and local government from taxes and nontaxes (personal, corporate, indirect business, and social insurance), and Federal grants-in-aid. To this total are added intergovernmental transfers between State and Counties, and other receipts (e.g., borrowing, sales of land or property) to equal Total Revenues.

Transfer Payments to Persons, Federal—Includes payments made by the Federal Government which do not provide any services or productive activity in exchange. Federal programs include Old Age and Survivors' benefits (OASDHI), unemployment insurance benefits, railroad retirement, military pensions, disability and retirement payments, military mustering-out payments, veterans' readjustment, and schooling allowance.

Transfer Payments to Persons, State and Local—Includes payments which do not provide any services or productive activity to government in exchange. State government transfer payments consist of employee retirement payments, general assistance (welfare), workers' compensation, and educational subsidies.

Undistributed Profits—Represents the profits (total corporate receipts less allowable deductions) of Hawaii corporations after State and Federal corporate profits taxes and dividends to shareholders have been paid.

Unemployment Insurance—Covers both civilian and military employees. It is a joint Federal-State social insurance program which has been defined in this study as a Federal program.

Unilateral Transfer Payments to Persons, Net—Estimates personal cash remittances going outside of Hawaii to the Mainland and foreign countries, less personal cash remittances to Hawaii from outsiders for which no goods or services are recorded in return, membership dues to organizations, and remittances of charitable and religious groups. Negative sign indicates that remittances to Hawaii were greater than those from Hawaii to outsiders. It is calculated as the difference between payments by Hawaii to the rest-of-the-world (an export) and payments to Hawaii by the rest-of-the-world (an import).

Utilities, State and Local—Is a municipally-owned and operated water supply, electric light and power, gas supply, or transit system which obtains at least 50 percent of its operating revenue from user charges. Other governmental enterprises are classified as general government activities such as port facilities (harbors), housing and redevelopment projects, airports, and other governmental enterprises which do not meet the above requirements of a governmental utility. In the Hawaii Gross State Product Accounts, the electric and gas utilities are privately owned and operated; the transit system obtains less than 50 percent of operating revenue from users and therefore only the county water supply systems are government enterprise utilities.

Visitor and Crew Expenditures— Estimates the purchases of goods and services of nonresidents of Hawaii in Hawaii.

Wages and Salaries—Are paid to employees in a given period of time, irrespective of when they are earned. These cover all employee earnings, including executive salaries and bonuses, commission, payments-in-kind, incentive payments, and tips.

Workers' Compensation—Is a State Government-sponsored social insuance program which covers employees' on-the-job injuries.
